#### Item 7.01. Regulation FD Disclosure.

On September 8, 2021, Roger W. Jenkins, President & Chief Executive Officer of Murphy Oil Corporation (the "Company"), will meet with certain investors of the Company. Attached hereto as Exhibit 99.1 is a copy of the presentation prepared by the Company in connection therewith.

The information in this Item 7.01, including Exhibit 99.1, is being furnished and shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended ("Exchange Act"), or otherwise subject to the liabilities of that Section, and shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended, or the Exchange Act, except as otherwise expressly stated in such filing.

This Current Report on Form 8-K, including the information furnished pursuant to Item 7.01 and the related Item 9.01 hereto, contains forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management's current views concerning future events or results, are subject to inherent risks and uncertainties. Forward-looking statements are generally identified through the inclusion of words such as "aim," "anticipate," "believe," "drive," "estimate," "expressed confidence," "forecast," "future," "goal," "guidance," "intend," "may," "objective," "outlook," "plan," "position," "potential," "project," "seek," "should," "strategy," "target," "will" or variations of such words and other similar expressions. These statements, which express management's current views concerning future events or results, are subject to inherent risks and uncertainties. Factors that could cause one or more of these future events or results not to occur as implied by any forward-looking statement include, but are not limited to: macro conditions in the oil and gas industry, including supply/demand levels, actions taken by major oil exporters and the resulting impacts on commodity prices; increased volatility or deterioration in the success rate of the Company's exploration programs or in the Company's ability to maintain production rates and replace reserves; reduced customer demand for the Company's products due to environmental, regulatory, technological or other reasons; adverse foreign exchange movements; political and regulatory instability in the markets where the Company does business; the impact on the Company's operations or market of health pandemics such as COVID-19 and related government responses; other natural hazards impacting the Company's operations or markets; any other deterioration in the Company's business, markets or prospects; any failure to obtain necessary regulatory approvals; any inability to service or refinance the Company's outstanding debt or to access debt markets at acceptable prices; and adverse developments in the U.S. or global capital markets, credit markets or economies in general. For further discussion of factors that could cause one or more of these future events or results not to occur as implied by any forward-looking statement, see "Risk Factors" in the Company's most recent Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission ("SEC") and any subsequent Quarterly Report on Form 10-Q or Current Report on Form 8-K that the Company files, available from the SEC's website and from the Company's website at http://ir.murphyoilcorp.com. The Company undertakes no duty to publicly update or revise any forward-looking statements.

## Cautionary Statement and Investor Relations Contacts

Cautionary Note to US Investors – The United States Securities and Exchange Commission (SEC) requires oil and natural gas companies, in their filings with the SEC, to disclose proved reserves that a company has demonstrated by actual production or conclusive formation tests to be economically and legally producible under existing economic and operating conditions. We may use certain terms in this presentation, such as "resource", "gross resource", "recoverable resource", "net risked PMEAN resource", "recoverable oil", "resource base", "EUR" or "estimated ultimate recovery" and similar terms that the SEC's rules prohibit us from including in filings with the SEC. The SEC permits the optional disclosure of probable and possible reserves in our filings with the SEC. Investors are urged to consider closely the disclosures and risk factors in our most recent Annual Report on Form 10-K filed with the SEC and any subsequent Quarterly Report on Form 10-Q or Current Report on Form 8-K that we file, available from the SEC's website.

Forward-Looking Statements — This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are generally identified through the inclusion of words such as "aim", "anticipate", "believe", "drive", "estimate", "expect", "expressed confidence", "forecast", "future", "goal", "guidance", "intend", "may", "objective", "outlook", "plan", "position", "potential", "project", "seek", "should", "strategy", "target", "will" or variations of such words and other similar expressions. These statements, which express management's current views concerning future events or results, are subject to inherent risks and uncertainties. Factors that could cause one or more of these future events or results not to occur as implied by any forward-looking statement include, but are not limited to: macro conditions in the oil and natural gas industry, including supply/demand levels, actions taken by major oil exporters and the resulting impacts on commodity prices; increased volatility or deterioration in the success rate of our exploration programs or in our ability to maintain production rates and replace reserves; reduced customer demand for our products due to environmental, regulatory, technological or other reasons; adverse foreign exchange movements; political and regulatory instability in the markets where we do business; the impact on our operations or market of health pandemics such as COVID-19 and related government responses; other natural hazards impacting our operations or markets; any other deterioration in our business, markets or prospects; any failure to obtain necessary regulatory approvals; any inability to service or refinance our outstanding debt or to access debt markets at acceptable prices; or adverse developments in the US or global capital markets, credit markets or economies in general. For further discussion of factors that could cause one or more of these future events or results not to occur as implied by any forwar

Non-GAAP Financial Measures - This presentation refers to certain forward-looking non-GAAP measures. Definitions of these measures are included in the appendix

Company Overview

Murphy Priorities

Murphy Portfolio

Looking Ahead

www.murphyoilcorp.com NYSE: MUR

## Murphy at a Glance

# Murphy is an independent exploration and production company, producing in three areas with an advantaged portfolio and exploration upside

#### **Onshore United States**

- Eagle Ford Shale on private lands in Texas with ~1,400 future locations on ~134,000 net acres
- · Produced 41.5 MBOEPD in 2Q 2021, comprised of 75% oil and 88% liquids

#### Onshore Canada

- Tupper Montney ~1,400 future locations on ~100,000 net acres, produced 248 MMCFD in 2Q 2021
- Kaybob Duvernay ~600 future locations on ~170,000 net acres, produced 9.7 MBOEPD in 2Q 2021

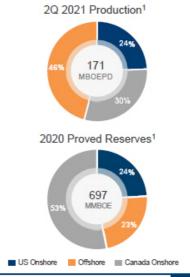

#### Offshore Deepwater Gulf of Mexico

- Fifth largest producer in the Gulf of Mexico, produced 74.4 MBOEPD<sup>1</sup> in 2Q 2021
- · Executing 3 major projects on schedule, with first oil expected in 2022

#### Exploration

 ~1.1 BBOE of risked mean resources and more than 8 MM net acres across Gulf of Mexico, offshore Mexico, Brazil, Vietnam and Australia

1 Excluding noncontrolling interest Note: Future locations and net acres as of December 31, 2020

www.murphyoilcorp.com NYSE: MUR

## Why Murphy Oil?

Sustainable oil and natural gas assets that are safely operated with low carbon emissions intensity in three operating areas across North America

High-potential exploration portfolio with industry-leading offshore canabilities

Strong generator of free cash flow with capital allocation flexibility

Financial discipline has led to 60-year track record of returning capital to shareholders

Supported by multi-decade founding family, with meaningful board and management ownership

## Low Emissions Intensity Energy Generation

- Lowering emissions intensity 15-20% by 2030
- · Realizing lower costs while reducing environmental impacts
- Deepwater offshore assets have the lowest carbon intensity in global oil-producing fields
- · Monitoring and evaluating further actions to decarbonize

Ranked top-quartile in carbon intensity for 2020 among oil-weighted peers

www.murphyoilcorp.com NYSE: MUR \_

### 2021 Sustainability Report Highlights

#### Continued Environmental Leadership and Stewardship

- · Revised and strengthened climate change position
- · Obtained third-party assurance of 2020 Scope 1 and 2 GHG emissions
- · Established goal of zero routine flaring by 2030
- · Evaluating methane and flaring intensity targets

#### **Progressed Environmental Goals**

- · Achieved 47% reduction in Scope 1 and 2 GHG emissions since 2016
- · Reduced GHG emissions intensity by 10% in 2020 from 2019 baseline

#### Committed to Our People and Communities

- · Operating safely while minimizing interruptions throughout COVID-19
- · Instituted Human Rights Policy
- · Ongoing philanthropy

#### Expanded Diversity, Equity and Inclusion Efforts and Reporting

- · Advanced internal DE&I awareness
- Established employee-led DE&I committee
- Increased disclosures of Equal Employment Opportunity (EEO-1) diversity data

Ranked #1 in Governance by ISS since 2018

### High-Potential Exploration Portfolio With Leading Offshore Execution Ability

### Focused and Meaningful

- · Four primary exploration areas
- · Targeting 3 to 5 exploration wells per year

#### Reduced Risk

· Leveraging strategic partnerships

### **Strategic Themes**

- · Consistent US Gulf of Mexico program
- · High-impact potential from Brazil and Mexico

#### Significant Resource Base

- · ~1.1 BBOE net risked resources
- · 8.5 MM net acres

### Strong Execution Ability

 Maintained schedule on major operated Gulf of Mexico projects throughout COVID-19

King's Quay Enroute on Heavy Lift Vessel

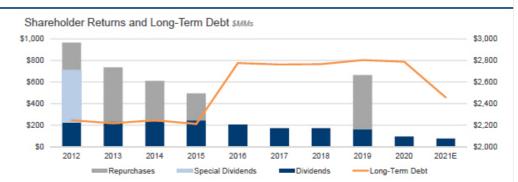

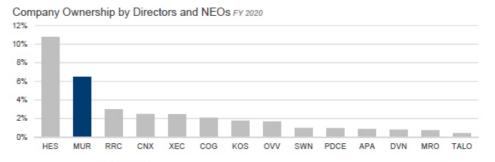

NYSE: MUR

## Long-Term Shareholder Support With Significant Board Ownership

- · Initiated dividend in 1961
- Returned ~\$4.0 BN to shareholders in last 10 years
- \$1.9 BN in share repurchases, 2012 – 2021E
  - Representing >20% of total shares outstanding
- High stock ownership by directors and NEOs solidifies shareholder alignment
- Plan allows for long-term debt reduction to ~\$1.4 BN by YE 2024 from YE 2020

www.murphyoilcorp.com NYSE: MUR

Leaning Into Challenges with Sustainable Solutions

## 2Q 2021 Progress on Strategic Priorities

#### **DELEVER**

- Achieved initial debt reduction event in 1Q 2021 of 8%, or ~\$230 MM
- Increased goal for 2Q 4Q 2021 long-term debt reduction to \$300 MM from \$200 MM, for total of ~17% reduction FY 2021 at \$65 oil price for remainder of year\*

#### **EXECUTE**

- Brought onshore wells online ahead of schedule and under budget
- Produced 100 MBOPD oil, exceeding guide by 5%, with total Eagle Ford Shale production 10% above
- Delivered strong operational performance with less non-productive time
- Remain on schedule for major offshore projects

#### **EXPLORE**

- Participated in drilling a discovery in Brunei with the Jagus SubThrust-1X exploration well
- Spud Silverback exploration well in Gulf of Mexico in 2Q 2021
- Cutthroat exploration well in Brazil planned to spud in 4Q 2021

\* Dependent on timing of third-party Gulf of Mexico downstream operations post-storm

### What's New in 3Q 2021

### King's Quay Floating Production System

- Arrived shoreside in Gulf of Mexico on schedule in September
  - · No storm impact

### **Gulf of Mexico Major Projects**

- · Samurai #4 drilling in progress, Khaleesi #3 drilled
  - · Beginning subsea installation 3Q 2021
  - · Remain on track for first oil in 1H 2022
- Final producer well of St. Malo waterflood (non-op) campaign online prior to storm

### **Gulf of Mexico Updates**

- Lease sale expected to occur by YE 2021
- · Calliope well online prior to storm

#### **Debt Reduction Plan**

- Redeemed \$150 MM of 2024 Notes in Aug 2021
- On target to achieve \$300 MM of long-term debt reduction by YE 2021\*

### **Hurricane Ida Update**

- · Operated facilities re-manned shortly after storm
  - Ready to produce, awaiting third-party downstream capabilities
  - ~9 MBOEPD (net) producing now
  - ~1 MBOEPD (net) to remain offline for repairs
  - · No indications of any pipeline leaks
- Port Fourchon shorebase reopening in near term, backup locations operational
- · Withdrawing production guidance
  - Awaiting third-party downstream reports

<sup>\*</sup> Dependent on timing of third-party Gulf of Mexico downstream operations post-storm

## Strong Cash Flow Generation Supports Shareholder Initiatives

#### Flexible Capital to Maximize FCF Generation

- All assets generated FCF YTD 2021, excluding corporate expenses
- Maintaining 2021 CAPEX guidance midpoint of \$700 MM

#### **Executing Debt Reduction Plan**

- Disclosed goal to reduce long-term debt by \$300 MM in 2021\*
  - · Initial \$150 MM of 2024 Notes redeemed in 3Q 2021
- Achieve 50% total debt reduction by YE 2024 at \$60 long-term WTI oil price

#### Long-Term Dividend Commitment

- FCF generation supports long-standing dividend
  - · \$77 MM annualized

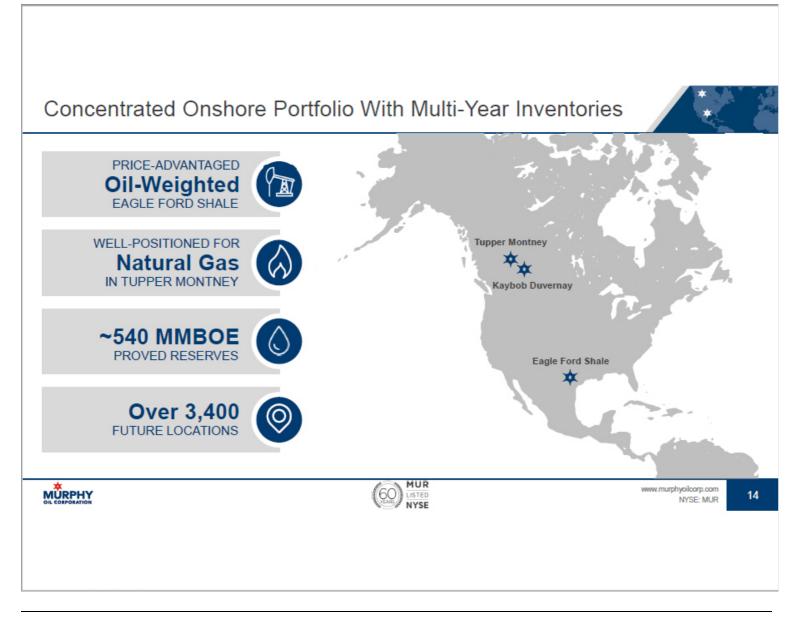

www.murphyoilcorp.com NYSE: MUR

## Well-Established Gulf of Mexico Portfolio

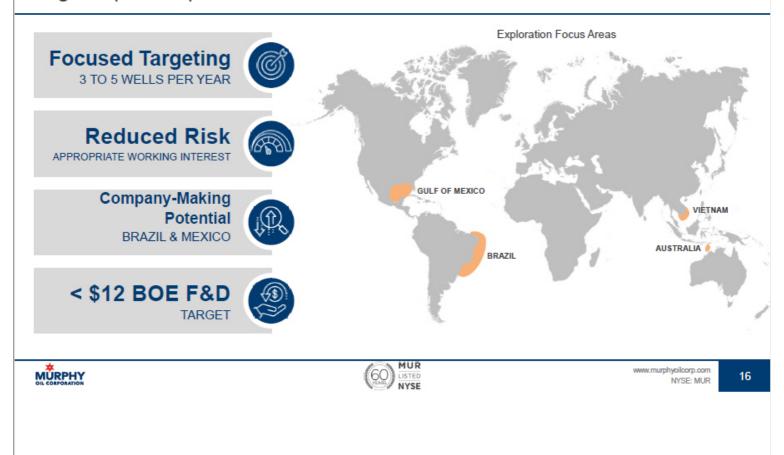

www.murphyoilcorp.com NYSE: MUR

## High-Impact Exploration Portfolio

## Tightening 2021 Capital Program

### Focusing CAPEX On High-Margin Assets

- · \$325 MM allocated to Gulf of Mexico
  - 2021 Gulf of Mexico spending primarily directed toward major projects, providing long-term production volumes
- · \$170 MM allocated to Eagle Ford Shale
- · \$85 MM allocated to Tupper Montney

CAPEX by Production Year

Canada Onshore

ExplorationOther

## Disciplined Strategy Leads to Long-Term Value

#### Delever, Execute, Explore

2021 - 2024

Achieve < \$1.4 BN debt by 2024\*

Spend annual average CAPEX of ~\$600 MM

Deliver production CAGR of ~6% in 2021 - 2024

Produce consistent oil-weighting, ~50% in 2021 - 2024

Maintain offshore production average of ~75 MBOEPD in 2021 - 2024

Advance exploration portfolio of > 1 BBOE net risked potential resources

Pay consistent dividend to shareholders

#### Forecast Debt Outstanding \$MMs

\* Assumes long-term \$60 WTI oil price

#### **Capital Allocation Optionality**

Reduce debt further

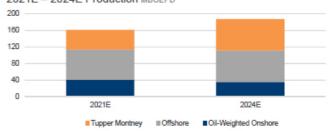

Allocate additional capital to assets

Fund exploration success

Evaluate strategic A&D opportunities

Return additional cash to shareholders

#### 2021E - 2024E Production MBOEPD

Note: Oil-weighted onshore includes Eagle Ford Shale and Kaybob Duvernay

## Focused on Targeted Priorities

#### **DELEVER**

- Increased goal for 2Q 4Q 2021 long-term debt reduction to \$300 MM from \$200 MM, for total of ~17% reduction FY 2021 at \$65 oil price for remainder of year\*
- Plan allows for long-term debt reduction to ~\$1.4 BN by YE 2024 from YE 2020\*\*, with potential for further reductions long-term

#### **EXECUTE**

- Progress major projects in the Gulf of Mexico ahead of first oil in 1H 2022
- Continue achieving drilling and completions cost efficiencies and lowering emissions intensity
- Maintain strong safety and environmental metrics

#### **EXPLORE**

- Focus on drilling non-op wells in Gulf of Mexico, Brazil and Brunei in 2021
- Progress on 2022 exploration plans with partners

<sup>\*</sup> Dependent on timing of third-party Gulf of Mexico downstream operations post-storm \*\* Using strip prices through 2022 and \$55/BBL for 2023-2024

## Why Murphy Oil?

Sustainable oil and natural gas assets that are safely operated with low carbon emissions intensity in three operating areas across North America

High-potential exploration portfolio with industry-leading offshore capabilities

Strong generator of free cash flow with capital allocation flexibility

### Non-GAAP Financial Measure Definitions and Reconciliations

The following list of Non-GAAP financial measure definitions and related reconciliations is intended to satisfy the requirements of Regulation G of the Securities Exchange Act of 1934, as amended. This information is historical in nature. Murphy undertakes no obligation to publicly update or revise any Non-GAAP financial measure definitions and related reconciliations.

www.murphyoilcorp.com NYSE: MUR

### Non-GAAP Reconciliation

#### **EBITDA and EBITDAX**

Murphy defines EBITDA as net income (loss) attributable to Murphy<sup>1</sup> before interest, taxes, depreciation and amortization (DD&A). Murphy defines EBITDAX as net income (loss) attributable to Murphy before interest, taxes, depreciation and amortization (DD&A) and exploration expense.

Management believes that EBITDA and EBITDAX provide useful information for assessing Murphy's financial condition and results of operations and are widely accepted financial indicators of the ability of a company to incur and service debt, fund capital expenditure programs, pay dividends and make other distributions to stockholders.

EBITDA and EBITDAX, as reported by Murphy, may not be comparable to similarly titled measures used by other companies and should be considered in conjunction with net income, cash flow from operations and other performance measures prepared in accordance with generally accepted accounting principles (GAAP). EBITDA and EBITDAX have certain limitations regarding financial assessments because they exclude certain items that affect net income and net cash provided by operating activities. EBITDA and EBITDAX should not be considered in isolation or as a substitute for an analysis of Murphy's GAAP results as reported.

\$ Additions	Three Months Ended – June 30, 2021	Three Months Ended – June 30, 2020
Net (loss) income attributable to Murphy (GAAP)	(63.1)	(317.1)
Income tax (benefit) expense	(11.2)	(94.8)
Interest expense, net	43.4	38.6
DD&A expense	217.3	219.1
EBITDA attributable to Murphy (Non-GAAP)	186.4	(154.2)
Exploration expense	13.5	29.5
EBITDAX attributable to Murphy (Non-GAAP)	199.9	(124.7)

1 'Attributable to Murphy' represents the economic interest of Murphy excluding a 20% noncontrolling interest in MP GOM.

### Non-GAAP Reconciliation

#### ADJUSTED EBITDA

Murphy defines Adjusted EBITDA as net income (loss) attributable to Murphy¹ before interest, taxes, depreciation and amortization (DD&A), impairment expense, discontinued operations, foreign exchange gains and losses, mark-to-market gains and losses on crude oil derivative contracts, accretion of asset retirement obligations and certain other items that management believes affect comparability between periods.

Adjusted EBITDA is used by management to evaluate the company's operational performance and trends between periods and relative to its industry competitors.

Adjusted EBITDA may not be comparable to similarly titled measures used by other companies and it should be considered in conjunction with net income, cash flow from operations and other performance measures prepared in accordance with generally accepted accounting principles (GAAP). Adjusted EBITDA has certain limitations regarding financial assessments because it excludes certain items that affect net income and net cash provided by operating activities. Adjusted EBITDA should not be considered in isolation or as a substitute for an analysis of Murphy's GAAP results as reported.

8 Millions, except per BOE amounts	Three Months Ended – June 30, 2021	Three Months Ended – June 30, 2020	
EBITDA attributable to Murphy (Non-GAAP)	186.4	(154.2)	
Mark-to-market loss (gain) on crude oil derivative contracts	130.9	184.5	
Impairment of assets	7.2	19.6	
Mark-to-market loss (gain) on contingent consideration	61.8	15.7

TOC: Total organic content

WI: Working interest

WTI: West Texas Intermediate (a grade of

crude oil)

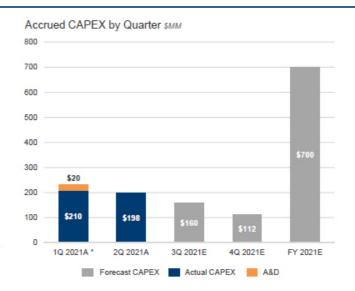

## Achieving Disciplined Capital Execution to Support 2021 Priorities

### **Continuing Plan Execution**

- 2Q 2021 accrued CAPEX of \$198 MM aligned with plan
- Primary business units' CAPEX heavily weighted to 1H 2021
  - · Eagle Ford Shale 63% of FY 2021 plan
  - · Gulf of Mexico 66% of FY 2021 plan
  - · Onshore Canada 76% of FY 2021 plan

### **Disciplined Spending Tightens CAPEX Range**

- Adjusting FY 2021 CAPEX guide to \$685 \$715 MM, with \$700 MM remaining as midpoint
- Continuing cost management through drilling and completions technologies and operational efficiencies

Accrual CAPEX, based on midpoint of guidance range and excluding noncontrolling interest \* Excludes King's Quay CAPEX of \$17 MM

Balancing Investments for Free Cash Generation to Delever Balance Sheet

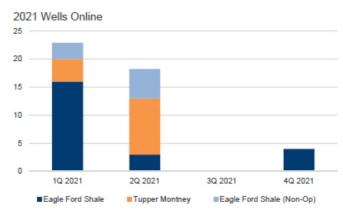

# 2Q 2021 Onshore Activity

- · Eagle Ford Shale
  - 3 operated wells + 29 gross non-operated wells\* online
- · Tupper Montney
  - 10 operated wells online, FY 2021 program complete

# FY 2021 Onshore Activity

- · Eagle Ford Shale
  - 23 operated + 45 gross non-operated wells\* online
- · Tupper Montney
  - · 14 operated wells online

Note: Non-op well cadence subject to change per operator plans Eagle Ford Shale non-operated wells adjusted for 18% average working interest

<sup>\*</sup> Eagle Ford Shale non-operated wells average 18% working interest

# Eagle Ford Shale

Base Production Outperforms While Lowering Costs

# 2Q 2021 Activity

- · 3 operated wells online, all Catarina Lower EFS
  - Avg 1,080 BOEPD IP30, 87% oil
- 29 gross non-op wells online, primarily Karnes Upper EFS and Austin Chalk
  - Avg 1,700 BOEPD IP30

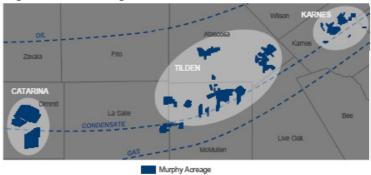

# 2H 2021 Activity

- · 4 operated wells online in Catarina in 4Q 2021
  - · 1 Upper EFS, 2 Lower EFS, 1 Austin Chalk
- · Reaffirm FY 2021 CAPEX of \$170 MM

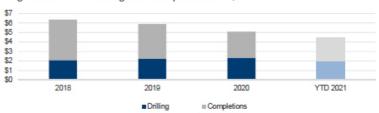

### **Drilling and Completions Costs**

- · ~40% reduction in completions costs since FY 2018
  - · 25% reduction in CLAT since FY 2019
- · 24% increase in RoP since FY 2018
- \$4.7 MM avg well cost in 1H 2021, down from \$6.3 MM in FY 2018
  - · Now achieving ~9 month well payout

### Eagle Ford Shale Acreage

Eagle Ford Shale Drilling and Completions \$MM per well

# Eagle Ford Shale

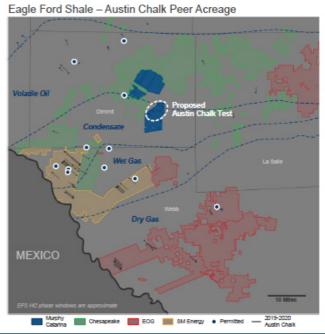

Analyzing Results in Austin Chalk De-Risk Murphy Locations

# Achieving Strong Austin Chalk Results

- · Recent Karnes wells meaningfully outperforming type curve
  - · Avg 1,400 BOEPD IP30 rate
  - ~100 Karnes locations as of FYE 2020
- Operators near Murphy Catarina acreage reporting robust production rates
  - · Working to delineate their acreage
- 1 Murphy Austin Chalk well online in Catarina in 4Q 2021
  - Potential to de-risk ~110 Catarina locations as of FYE 2020

# **Tupper Montney**

Increasing Recoveries While Lowering Costs

# 2Q 2021 Activity

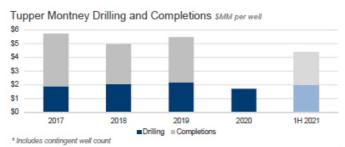

· 10 wells online, activity complete for FY 2021

# Lowering D&C costs

- · 24% reduction since FY 2017
- \$4.4 MM avg well cost in 1H 2021, down from \$5.5 MM in FY 2019
  - · 25% reduction in CLAT since FY 2019

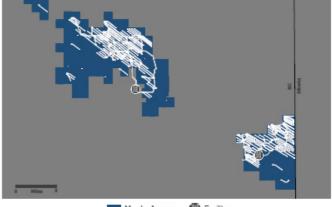

### Low Execution Risk

- Average ultimate recovery of ~21 BCF / well
- · Low subsurface risk from proven resource
- · Ample existing take-away and infrastructure in place

Tupper Montney Acreage

# **Tupper Montney Project**

Low Carbon Intensity Development With Attractive Cash Margins

### **Tupper Montney Advantages**

- · Employ capital allocation process that maximizes free long term cash flow
  - Generates greater cash margin per well than Eagle Ford Shale at conservative prices
  - < \$1 / MCF average new well breakeven cost</li>
- · Long history of continuous improvement
  - Increasing laterals to ~11,000'
  - · Improved drilling and completion costs to ~\$5 MM / well
  - · Increased average ultimate recovery to ~21 BCF / well

### Improved Macro Economics for Region

- · Increased local take-away capacity and debottlenecking completed
  - 600 MMCFD westward export 2020 2022
  - 1.3 BCFD eastward export 2021 2022
- · Declining regional production 2 BCFPD lower Y-o-Y
- · Improved domestic demand due to coal to natural gas switching
- Construction underway for LNG Canada project, estimated in service in 2005
- · Lowest AECO to Henry Hub basis differential in 5 years

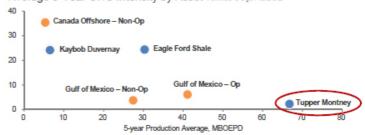

### Low Carbon Intensity Asset

· Lowest greenhouse gas intensity asset in current portfolio

Cash margins based on average price \$44 / WTI, \$1.78 / MCF AECO

### Average 5-Year GHG Intensity by Asset Tonnes COge / MBOE

Note: 5-year average intensity based on internal estimates

# **Tupper Montney Development**

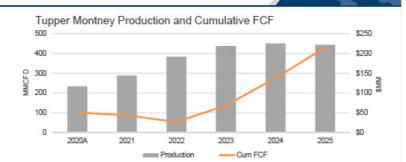

High Impact Development Drives Future Cash Flows

# **Tupper Montney Development Plan**

- Commitment to infrastructure approved 2Q 2018; sanctioned 4Q 2020
- Free cash flow generated in 2020 of ~\$50 MM covers cumulative free cash flow requirement of \$24 MM for 2021 – 2022
- Average annual CAPEX of ~\$68 MM from 2020 – 2025
- Cumulative free cash flow of ~\$215 MM from 2020 – 2025

### Low Execution Risk

- Increased average ultimate recovery to ~21 BCF / well
- · Low subsurface risk from proven resource
- Ample existing take-away and infrastructure in place
- Mitigate price risk with fixed price forward sales contracts through 2024

Note: Free cash flow = operating cash flow (-) CAPEX (-) abandonment FCF based on average price \$1.98/MCF hedged, \$1.78/MCF AECO Note: Future production volumes based on current sanctioned plan

# 2021 Exploration Plan Northwest Borneo Basin, Brunei

# **Asset Overview**

- Shell 86.949% (Op), Murphy 8.051%, Petronas 5%
- · Partners assessing development and appraisal plan
- · Block CA-1 reclassified as not held for sale

# Jagus SubThrust-1X (Block CA-1)

- · Drilled discovery well, \$2.8 MM net cost
- · Evaluating seismic data for remaining prospectivity

# Northwest Borneo Basin

# 2021 Exploration Plan

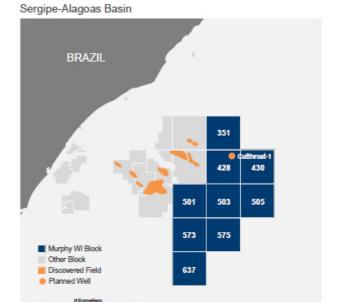

Sergipe-Alagoas Basin, Brazil

# **Asset Overview**

- ExxonMobil 50% (Op), Enauta Energia S.A. 30%, Murphy 20%
- · Hold WI in 9 blocks, spanning >1.6 MM acres
- · >2.8 BN BOE discovered in basin
- >1.2 BN BOE in deepwater since 2007
- Material opportunities identified on Murphy WI blocks

# **Drilling Program**

- · On track for drilling Cutthroat-1 in 4Q 2021
  - ~\$15 MM net cost
- · Mean to upward gross resource potential
  - 500 MMBOE 1,050 MMBOE
- Continuing to mature inventory and plan future well timing

All blocks begin with SEAL-M

# 2021 Exploration Update

Potiguar Basin, Brazil

# **Asset Overview**

- · Wintershall Dea 70% (Op), Murphy 30%
- Hold WI in 3 blocks, spanning ~775 M gross acres
- Proven oil basin in proximity to Pitu oil discovery

# Extending the Play into the Deepwater

- · >2.1 BBOE discovered in basin
  - · Onshore and shelf exploration
  - · Pitu step-out into deepwater
- · Interpreting final seismic data
- · Targeting 2023 spud
