MURPHY OIL ANNOUNCES EARNINGS

EL DORADO, Arkansas, April 28, 2004 – Murphy Oil Corporation (NYSE: MUR) announced today that net income in the first quarter of 2004 was \$98.2 million (\$1.05 per diluted share) compared to net income of \$87.1 million (\$.94 per diluted share) in the first quarter of 2003. The improvement in 2004 income was attributable to better exploration and production earnings, partially offset by higher losses in refining and marketing operations and higher net costs from corporate functions. The Company has previously announced that it has binding agreements to sell most of its conventional oil and gas assets in Western Canada. The Company expects to close on the sale in the second quarter 2004. The operating results of these assets to be sold have been accounted for as discontinued operations for all periods presented. Earnings from discontinued operations were \$17.5 million (\$.19 per share) in 2004 and \$11.2 million (\$.12 per share) in 2003. Earnings from continuing operations were \$80.7 million (\$.86 per share) in 2004 and \$82.9 million (\$.90 per share) in 2003.

Murphy's income from continuing exploration and production operations was \$101.2 million in the first quarter of 2004 compared to \$75.7 million in the same quarter of 2003. Higher realized sales prices for crude oil, higher oil and natural gas sales volumes from continuing operations, and a \$15.4 million after-tax gain on disposal of several minor oil and gas properties were the primary reasons for improved earnings. Exploration expenses increased from \$15.4 million in the 2003 period to \$49.1 million in 2004 primarily due to higher dry hole costs of \$39.1 million in the United States and Malaysia. The Company's worldwide crude oil and condensate sales prices averaged \$30.95 per barrel for the current quarter compared to \$27.90 per barrel in the first quarter of 2003. Total crude oil and gas liquids production from continuing operations was 95,128 barrels per day in the first quarter of 2004 compared to 67,813 barrels per day in the 2003 quarter. The 40% increase in crude oil production in the 2004 period was mostly attributable to production from the Medusa and Habanero fields in the deepwater Gulf of Mexico and the West Patricia field in shallow-water Malaysia, all of which came on stream in mid to late 2003. North American natural gas sales prices averaged \$5.88 per thousand cubic feet (MCF) in the most recent quarter compared to \$5.95 per MCF in the same quarter of 2003. Natural gas sales volumes from continuing operations increased from 116 million cubic feet per day in the first quarter of 2003 to 124 million cubic feet per day in the just completed quarter, primarily due to production from the Medusa and Habanero fields. In the first quarter of 2003, the Company's hedging program reduced the average worldwide crude oil sales price and North American natural gas sales price by \$3.16 per barrel and \$.49 per MCF, respectively.

The Company's refining and marketing operations incurred a loss of \$6.4 million in the 2004 quarter compared to a loss of \$3.5 million in the 2003 quarter. The Company's North American operations lost \$10.5 million in the first quarter of 2004 and \$6.4 million in the 2003 period. The larger loss was primarily due to poorer performance at the Meraux refinery, which is operating at less than optimum capacity during integration of a new unit and the rebuilding of the ROSE unit after the mid-year 2003 fire. Refining and marketing operations in the U.K. earned \$4.1 million in the first quarter of 2004, up from a \$2.9 million profit in the same quarter of 2003, with improved earnings based on better operating margins during the latest quarter.

Corporate functions reflected a loss of \$14.1 million in the 2004 quarter compared to income of \$10.7 million in the first quarter 2003. The 2003 period included a \$20.1 million

gain from resolution of prior-year U.S. tax matters. The 2004 period included lower interest capitalization because of start-up of the Medusa and Habanero fields and completion of the Meraux refinery expansion.

Claiborne P. Deming, President and Chief Executive Officer, commented, "Based on stronger oil and gas prices in 2004, Murphy Oil's first quarter consolidated earnings were the best since the second quarter of 2001. High oil prices experienced in the just completed quarter are predicted to weaken in the second quarter, but have thus far held strong based on high demand and an effective curtailment of production by OPEC. Natural gas prices will likely remain high in tandem with oil prices. Production from continuing operations is expected to average 117,000 barrels of oil equivalent per day in the second quarter. Anticipated operating performance improvements at the Meraux refinery should lead to better financial results in the Company's downstream business in the second quarter of 2004. Additionally, the start of the summer driving season in the U.S. should lead to stronger results in our retail gasoline business. We currently expect earnings from continuing operations in the second quarter to be between \$.90 and \$1.20 per share. Results could vary based on commodity prices, drilling results and timing of oil sales."

The public is invited to access the Company's conference call to discuss first quarter 2004 results on Thursday, April 29, at 12:00 p.m. CDT either via the Internet through the Investor Relations section of Murphy's website at **http://www.murphyoilcorp.com/ir** or via the telephone by dialing **1-800-366-7640**. The telephone reservation number for the call is **577079**. Replays of the call will be available through the same address on the Murphy website, and a recording of the call will be available through May 3 at 1-800-405-2236.

Summary financial data and operating statistics for the first quarter 2004 with comparisons to 2003 are contained in the attached tables.

The forward-looking statements reflected in this release are made in reliance upon the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. No assurance can be given that the results discussed herein will be attained, and certain important factors that may cause actual results to differ materially are contained in Murphy's January 15, 1997 Form 8-K report on file with the U.S. Securities and Exchange Commission.
