Cautionary Statement and Investor Relations Contacts

Cautionary Note to US Investors – The United States Securities and Exchange Commission (SEC) requires oil and natural gas companies, in their filings with the SEC, to disclose proved reserves that a company has demonstrated by actual production or conclusive formation tests to be economically and legally producible under existing economic and operating conditions. We may use certain terms in this presentation, such as "resource", "gross resource", "recoverable resource", "net risked PMEAN resource", "recoverable oil", "resource base", "EUR" or "estimated ultimate recovery" and similar terms that the SEC's rules prohibit us from including in filings with the SEC. The SEC permits the optional disclosure of probable and possible reserves in our filings with the SEC. Investors are urged to consider closely the disclosures and risk factors in our most recent Annual Report on Form 10-K filed with the SEC and any subsequent Quarterly Report on Form 10-Q or Current Report on Form 8-K that we file, available from the SEC's website.

This presentation contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are generally identified through the inclusion of words such as "aim", "anticipate", "believe", "drive", "estimate", "expressed confidence", "forecast", "future", "goal", "guidance", "intend", "may", "objective", "outlook", "plan", "position", "potential", "project", "seek", "should", "strategy", "target", "will" or variations of such words and other similar expressions. These statements, which express management's current views concerning future events, results and plans, are subject to inherent risks, uncertainties and assumptions (many of which are beyond our control) and are not guarantees of performance. In particular, statements, express or implied, concerning the company's future operating results or activities and returns or the company's ability and decisions to replace or increase reserves, increase production, generate returns and rates of return, replace or increase drilling locations, reduce or otherwise control operating costs and expenditures, generate cash flows, pay down or refinance indebtedness, achieve, reach or otherwise meet initiatives, plans, goals, ambitions or targets with respect to emissions, safety matters or other ESG (environmental/social/governance) matters, or pay and/or increase dividends or make share repurchases and other capital allocation decisions are forward-looking statements. Factors that could cause one or more of these future events, results or plans not to occur as implied by any forward-looking statement, which consequently could cause actual results or activities to differ materially from the expectations expressed or implied by such forward-looking statements, include, but are not limited to: macro conditions in the oil and gas industry, including supply/demand levels, actions taken by major oil exporters and the resulting impacts on commodity prices; increased volatility or deterioration in the success rate of our exploration programs or in our ability to maintain production rates and replace reserves; reduced customer demand for our products due to environmental, regulatory, technological or other reasons; adverse foreign exchange movements; political and regulatory instability in the markets where we do business; the impact on our operations or market of health pandemics such as COVID-19 and related government responses; other natural hazards impacting our operations or markets; any other deterioration in our business, markets or prospects; any failure to obtain necessary regulatory approvals; any inability to service or refinance our outstanding debt or to access debt markets at acceptable prices; or adverse developments in the U.S. or global capital markets, credit markets or economies in general. For further discussion of factors that could cause one or more of these future events or results not to occur as implied by any forward-looking statement, see "Risk Factors" in our most recent Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission ("SEC") and any subsequent Quarterly Report on Form 10-Q or Current Report on Form 8-K that we file, available from the SEC's website and from Murphy Oil Corporation's website at http://ir.murphyoilcorp.com. Investors and others should note that we may announce material information using SEC filings, press releases, public conference calls, webcasts and the investors page of our website. We may use these channels to distribute material information about the company, therefore we encourage investors, the media, business partners and others interested in our company to review the information we post on our website. Murphy Oil Corporation undertakes no duty to publicly update or revise any forward-looking statements.

Non-GAAP Financial Measures – This presentation refers to certain forward-looking non-GAAP measures. Definitions of these measures are included in the appendix.

Murphy at a Glance

Murphy is an independent exploration and production company, producing in three areas with an advantaged portfolio and exploration upside

Onshore United States

- Eagle Ford Shale on private lands in Texas with ~1,200 future locations on ~120,000 net acres
- Produced 32.3 MBOEPD in 4Q 2022, comprised of 70% oil and 85% liquids

Onshore Canada

- Tupper Montney ~1,000 future locations on ~120,000 net acres, produced 288.3 MMCFD in 4Q 2022
- Kaybob Duvernay ~600 future locations on ~150,000 net acres, produced 6.1 MBOEPD in 4Q 2022

Offshore Deepwater Gulf of Mexico

- Fifth largest producer in the Gulf of Mexico, produced 83.7 MBOEPD¹ in 4Q 2022
- Completed initial phase of Khaleesi, Mormont, Samurai field development project

OIL CORPORATION

Exploration

 ~1 BBOE of risked mean resources and more than 6 MM net acres across Gulf of Mexico, offshore Mexico, Brazil and Vietnam

1 Excluding noncontrolling interest. Proved reserves are based on preliminary year-end 2022 third-party audited volumes using SEC pricing Note: Future locations and net acres as of December 31, 2022

19% 173.6 MBOEPD 50%

4Q 2022 Production¹

Why Murphy Oil?

Sustainable oil and natural gas assets that are safely operated with low carbon emissions intensity in three operating areas across North America

High-potential exploration portfolio with industry-leading offshore capabilities

Strong generator of free cash flow with capital allocation flexibility

Financial discipline has led to 60-year track record of returning capital to shareholders

Supported by multi-decade founding family, with meaningful board and management ownership

MURPHY PRIORITIES

Progressing Strategic Priorities

DELEVER

- Targeting \$500 MM debt reduction in 2023, resulting in ~\$1.3 BN of total debt outstanding at YE 2023*
- Positioned to begin Murphy 2.0 of capital allocation framework with 25% of adjusted FCF¹ allocated to shareholder returns

EXECUTE

- Manage 2023 well program to deliver 10% oil production growth with lower CAPEX
- Continue improving onshore downtime and base
 production decline rates
- Strong safety culture with improving environmental performance

EXPLORE

- Drilling operated Longclaw-1 well in Gulf of Mexico
- Temporarily suspended operated Oso-1 well in Gulf of Mexico
- Advance approvals, prepare to spud third operated well in Gulf of Mexico in 1H 2023
- Progress longer-term exploration plans with partners

RETURN

Targeted returns to shareholders through share repurchases and potential dividend increases tied to debt levels

* Assumes \$75 WTI oil price and \$5.00 HH natural gas price in FY 2023

1 Adjusted FCF is defined as cash flow from operations before working capital change, less capital expenditures, distributions to NCI and projected payments, quarterly dividend and accretive acquisitions

Long History of Benefitting Shareholders

Returned to Shareholders

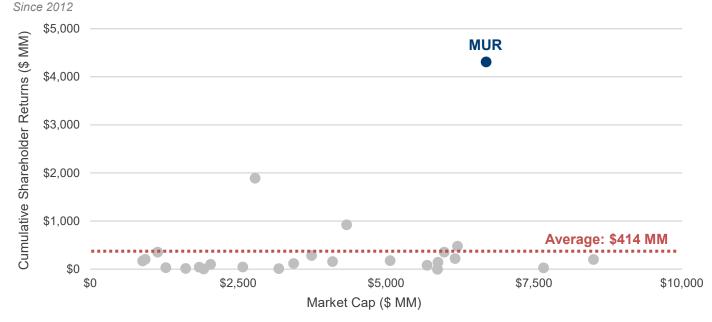

Returned to Shareholders

in Share Repurchases Since 2012

- Over a 60-year history of paying dividends
- Returned \$4.3 BN to shareholders vs peer average of \$414 MM since 2012

Peer Cumulative Shareholder Returns vs Market Cap < \$10 BN

Source: Company documents and Bloomberg as of February 12, 2023. Cumulative Shareholder Returns include all dividends and share buybacks from January 1, 2012 to February 12, 2023

Peers include AR, CHRD, CIVI, CNX, CPE, CRGY, CRK, DECPF, DEN, ESTE, GPOR, HPK, KOS, MGY, MTDR, MUR, PDCE, PR, ROCC, RRC, SM, SWN, TALO, VTLE, WTI

Reducing Long-Term Debt, Increasing Shareholder Returns Beyond Quarterly Dividend With Framework¹

Initial \$300 MM Share Repurchase Program² Authorized by Board

Murphy 1.0 – Long-Term Debt > \$1.8 BN

- Allocate adjusted FCF to long-term debt reduction
- Continue supporting the quarterly dividend

Murphy 2.0 – Long-Term Debt of \$1.0 BN – \$1.8 BN

- ~75% of adjusted FCF allocated to debt reduction
- ~25% distributed through share buybacks and potential dividend increases

Murphy 3.0 – Long-Term Debt < \$1.0 BN

- Up to 50% of adjusted FCF allocated to the balance sheet
- Minimum of 50% of adjusted FCF allocated to share buybacks and potential dividend increases

Adjusted Free Cash Flow Formula

Cash Flow From Operations Before WC Change

(-) Capital expenditures

- = Free Cash Flow
- (-) Distributions to NCI and projected payments³
- (-) Quarterly dividend
- (-) Accretive acquisitions
- = Adjusted Free Cash Flow (Adjusted FCF)

- 1 Based on current oil and natural gas prices and production remains at or slightly above the first quarter 2023 range of 161 169 MBOEPD. The timing and magnitude of debt reductions and share repurchases will largely depend on oil and natural gas prices, development costs and operating expenses, as well as any high-return investment opportunities. Because of the uncertainties around these matters, it is not possible to forecast how and when the company's targets might be achieved.
- 2 The share repurchase program allows the company to repurchase shares through a variety of methods, including but not limited to open market purchases, privately negotiated transactions and other means in accordance with federal securities laws, such as through Rule 10b5-1 trading plans and under Rule 10b-18 of the Exchange Act. This repurchase program has no time limit and may be suspended or discontinued completely at any time without prior notice as determined by the company at its discretion and dependent upon a variety of factors
- 3 Other projected payments such as the contractual contingent payments projected to end after the second quarter of 2023

Enhanced Sustainability Reporting Drives High Rankings

Reduced GHG Intensity and Flared Volumes

- Lowered emissions intensity 5% YoY to lowest level on record
- Reduced flared volumes from onshore assets to lowest level on record

Achieved Two Consecutive Years of Zero IOGP* Spills

Recorded Highest Water Recycling Ratio in Company History

 Recycled 3 MM BBL of water, or 28% of total water use across North America onshore assets, up from 18% in FY 2021

Supporting Industry Efforts for Consistent and Comparable Reporting

* IOGP = International Association of Oil & Gas Producers

IOGP Spill Rate is calculated as the total hydrocarbon spill volume of more than 1 BBL outside secondary containment per million barrels of oil equivalent of operated production
